

THE WORLD'S FOREMOST ENGINEER

Were it not for the assistance the Department of the Interior has rendered, our wonderful irrigation systems, waterworks and similar projects could never have been developed. Progress such as this is vital to all of us. This phase of our government's endeavors to further prosperity is graphically told in the fifth of the series of articles which we issue each month.

A BOY WITH A FORTUNE

A boy with a fortune is the boy who has one hundred dollars that he himself has saved. His fortune consists not alone of the money saved, and what boy with a hundred dollars would not feel like a millionaire?—but of a valuable lesson learned.

Not only has he experienced the thrill of possession, but he has caught the thrift habit. He has learned to do without useless things. He no longer squanders his money. He has better judgment of values. He is doubtless a far better boy.

Has your boy started to save? If he has not, there is no better time to teach him to begin than now—this bank.

Colds & Headache

"For years we have used Black-Draught in our family, and I have never found any medicine that could take its place," writes Mr. H. A. Stacy, of Bradyville, Tenn. Mr. Stacy writes that he is a Rutherford County farmer, recommends Black-Draught as a medicine that should be kept in every household for use in the prompt treatment of many little ills to prevent them from developing into serious troubles.

THE DRAUGHT'S BLACK-DRAUGHT

"It touches the liver and does the work," Mr. Stacy declared. "It is one of the best medicines I ever saw for a cold and headache. I don't know what we would do in our family if it wasn't for Black-Draught. It has saved us many dollars. I don't see how any family can hardly go without it. I know it is a reliable and splendid medicine to keep in the house. I recommend Black-Draught highly and am never without it."
